Ladtech HDPE Manhole Rings should be written into your next job specification.

DID YOU KNOW....

- Ladtech products are Manufactured to ASTM D4976 Standards
- Ladtech is designed to AASHTO H-25 highway standards
- Ladtech HDPE rings will pass I & I EPA standards
- LADTECH ADJUSTING RINGS ARE IMPACT RESISTANT

DON'T TAKE OUR WORD FOR IT....

Mike Simons has used Ladtech products for over 12 years!

"They are better than any adjusting rings around & I do not like using concrete and mortar. There are so many reasons why I like the Ladtech System and so many advantages over the concrete products that it is just the right choice."

Mike Simons – MN Contractor, CW Houle, 1/6/2009

"We at the City of Galena, IL have used the "Ladtech System"™ in our infrastructure since 2002 on some of the busiest streets in our city. In particular, the location of Highway 20/Spring Street. This area has approximately 11,500 to 12,000 vehicles a day of which heavy trucks comprise about 40% of the traffic. We have looked at these installations on a regular basis and have found that the Ladtech System"™ has stood up to the heavy load traffic with no defects; therefore we have allowed the Ladtech® rings to be used in our entire infrastructure.

Jeff Saylor – Facility/Area Manager, City of Galena, IL

"Just wanted to let you know that here at the Summerland Sanitary District (located in Santa Barbara County area) we have been using your rings for years. Our operators here at the treatment plant have raised every manhole in our district (Hundreds) using your rings and have never had any problems. Thanks for making such a great product.

Michael Sullivan, Operations Supervisor 1-21-2008

CASTING SAVER™

The Casting Saver™ is designed to keep your casting covers clean during the paving process.

The Casting Saver™ is available in a variety of sizes to fit your needs. They are reusable, magnetized to keep them in place while paving, easy to clean up, have an easy to find coloring and save on labor by eliminating chipping away of the asphalt.

LADTECH GUARANTEE

Ladtech guarantees a full ten year replacement warranty, that any damage to the Ladtech Rings will be replaced at no charge. If a manufacturing defect occurs within the first five years, Ladtech will dig up and replace the faulty product.

1/4" SPACER RING

The 1/4" Spacer Ring is used to finish grade where we were not able to have the correct sizes. This product can also be used to cover upper holes before placing casting.

1/4" Round Spacer Ring for:
24" Ladtech Round Rings
27" Ladtech Round Rings
30" Ladtech Round Rings

Distributors and contractors have been asking for a ring that will give them infinite possibilities to finish grade ring lift and slope.

This new Spacer Ring is used in conjunction with the Ladtech System® able to get the user to finite finished grade and slope.

Please call us for pricing. This product is available and can be shipped with your next order.

Also available in 1/3 round sections, as shown to the left.

40 may be the new 30, but green is definitely the new black. Please recycle!
